3.2.1. Institution has created an ecosystem for innovations and has initiatives for creation and transfer of knowledge

3.2.1 Institution has created an ecosystem for innovations and has initiatives for creation and transfer of knowledge

Innovations by the Faculty in shall be summarized as per the following description. Contributions to teaching and learning are activities that contribute to the creation and transfer of knowledge and improvement of student learning. These activities may include innovations including, however not limited to, use of ICT, in instruction delivery, instructional methods, assessment, evaluation and inclusive class rooms that lead to effective, efficient and engaging instruction.

The students and faculty are availing
Such as;

- Wi-Fi throughout the campus Internet facility of 40 Mbps is available to students and staff.
- A computing facility is available and adequate licensed software is also available.
- Students are encourage to participated in various conferences and work shop to upgrade their skills for academic excellence.
- Around 30 students are participated in avishkar conference in university department and 6 students are selected for university level avishkar conference.
- Around 10 stdents are qualified in GPAT 2024 from final year B.Pharm students and on students qualified for the GATE examination.
- 4 students are qualified NIPER examination held in 2024.
- Two students named Mr. Purushottam borase and Mr. Naresh patil of final year B. Pharm grab 1 lakh Rs prize money each in Maharashtra state innovation challenge at district level and promoted to state level under the guidance of Dr. Sachin M Mahajan,
- Around 4 patent published and 4 patents are granted during the academic year 2023-24 by the faculty members of from different departments.
- Around research/ review publication are published various peer reviewed journals, scopus indexed journals.
- Campus interview for the emerging final students and pass out students conducted in association with the various pharmaceutical companies such as Lupin, Glenmark, Megafine around 115 students are selected in campus interview

(57) Abstract :

The present invention relates to the A polyherbal suspension containing extracts from Curcuma caesia, Evolvulus alsinoide, Citrullus lanatus, Gymnema sylvestre, Tinospora cordifolia, Withania coagulans, and Caesalpinia bonduc was formulated to harness their combined potential. Phytochemical analysis confirmed the presence of glycosides, triterpenoids, flavonoids, saponins, alkaloids, and steroids. Stability studies, microbial tests, and heavy metal analysis demonstrated formulation safety. Antidiabetic efficacy was assessed in Alloxan-induced diabetic rats and oral glucose tolerance tests. Notably, the polyherbal formulation showed significant reductions in blood glucose levels, particularly in doses PHF 2(B) (200 mg/kg) and PHF 3(C) (400 mg/kg). Histopathological analysis of pancreatic tissues revealed architectural recovery. The formulation also displayed lipid-lowering activity, including decreased total cholesterol, triglycerides, SGPT, SGOT, and increased HDL levels. These findings suggest the polyherbal suspension's safety and potential as an effective antidiabetic treatment.

(57) Abstract :
The present invention relates to the an Ayurvedic preparation for treating surface warts was developed and standardized. The formulation comprised lemon oil and linseed oil, combined in varying proportions. The prepared formulations underwent comprehensive characterization using gas chromatography-mass spectroscopy (GC-MS), Fourier-transform infrared spectroscopy (FT-IR), Ultraviolet-Visible Spectroscopy (UV), and various physicochemical parameters such as saponification value, density, acid value, iodine value, and refractive index. Subsequently, the optimized formulation was selected based on the characterization results and subjected to a clinical trial involving human volunteers who provided informed consent. The formulation's stability was also evaluated under controlled conditions of 30 ± 2°C and 75 ± 5% RH. This holistic approach contributes to a standardized Ayurvedic solution for surface warts, encompassing formulation, characterization, clinical assessment, and stability analysis.
